Classes

```python
    def __init__(self):
        ...
        self._is_defined = False
        print("Class requires addition of at least 2 cats to be defined")

    def add_cat(self, new_cat):
        self.list_of
```

COURSEWORK You need to add objects/attributes without knowing ahead of time.
